

How to Import an MP3

GARAGEBAND

On iPhone/iPad

- Open Garageband and select + sign
 - Create new song and Select **Audio recorder**
 - Switch to track mode by tapping the **Track** sign at the top of the screen
 - Click the **loop** sign
 - Go to **Files**, browse items in the files app to locate the mp3 track
 - Hold down the mp3, drag and drop into Garageband
-

GARAGEBAND

On Mac

- Open Garageband and start a new track
 - If the MP3 is on the desktop simply click, drag and drop into the new track
 - If the MP3 is in Garageband/Apple Music library - go to media browser - locate and select the MP3 file you are looking for
 - Click, drag and drop the MP3 into the new track
-

AUDACITY

- Open Audacity
 - **Option 1:** Click, drag and drop the MP3
 - **Option 2** for multiple MP3s: Select **File > Import >** and **Select Audio**
 - Hold CTRL + SHIFT and Select your chosen multiple MP3 tracks
 - Click **Open**
-

SOUNDTRAP

- Open Soundtrap and click **Enter Studio**
- Start a **new music project**
- Click **Import file**
- Locate audio (MP3) file on your computer and click **Open**
