

The Nature of Science in Your Classroom

BUT – Remember – The Nature of Science is not something that 'just happens'....it must be planned for in teaching, learning and assessment.

The Learning Outcomes of the Nature of Science strand are realised through the content and activities in the contextual strands.

Nature of Science should be a part of **EVERY LESSON that you teach, rather than something that is done separate to the learning in the contextual strands**

In other words –
Nature of Science
IS NOT
all of it some of the time.....
IT IS
some of it, **ALL OF THE TIME**
