

My Geometry Journey - Looking In

This resource was developed and used in a Graphics Zoom event which aired on the 04th of November 2020 and can be viewed on www.jct.ie within the Graphics CPD supports tile under the elective workshops tab.

This Zoom event entitled “*My Geometry Journey – Reflecting on my learning journey of geometry in Graphics*” focused on a student resource which encourages the exploration of Geometry in the world around us. As part of the event teachers experienced breakout rooms where they met teachers who discussed their experience in embedding this strategy and approach in their classrooms.

What is included in this PDF?

1. Looking In strategy

Included in this PDF is a blank example of the Looking In strategy which was discussed and explored by teachers during the workshop.

A big thank you to the teachers involved in this workshop and making examples available to the JCT4 team.

Note: It is recommended that you watch the video series in conjunction with using this resource to contextualise the resource and make a better connection between this resource and the student experience.

Looking in

What geometry can I see in this picture?

What do I notice now that I didn't notice before?

How would I explain this geometry to someone else?

What other examples show this geometry?

Pause and reflect - What do I know now?

What next? How can this knowledge help me?
