What is included in this PDF?

Included in this PDF are some printable templates shared with attendees in conjunction with the webinar broadcast. Throughout the event attendees were afforded the opportunity to practice the marquetry window method using the templates provided in this resource. The resource also outlined a list of materials and equipment required for attendees who wished to practice the craft of marquetry while watching the event.

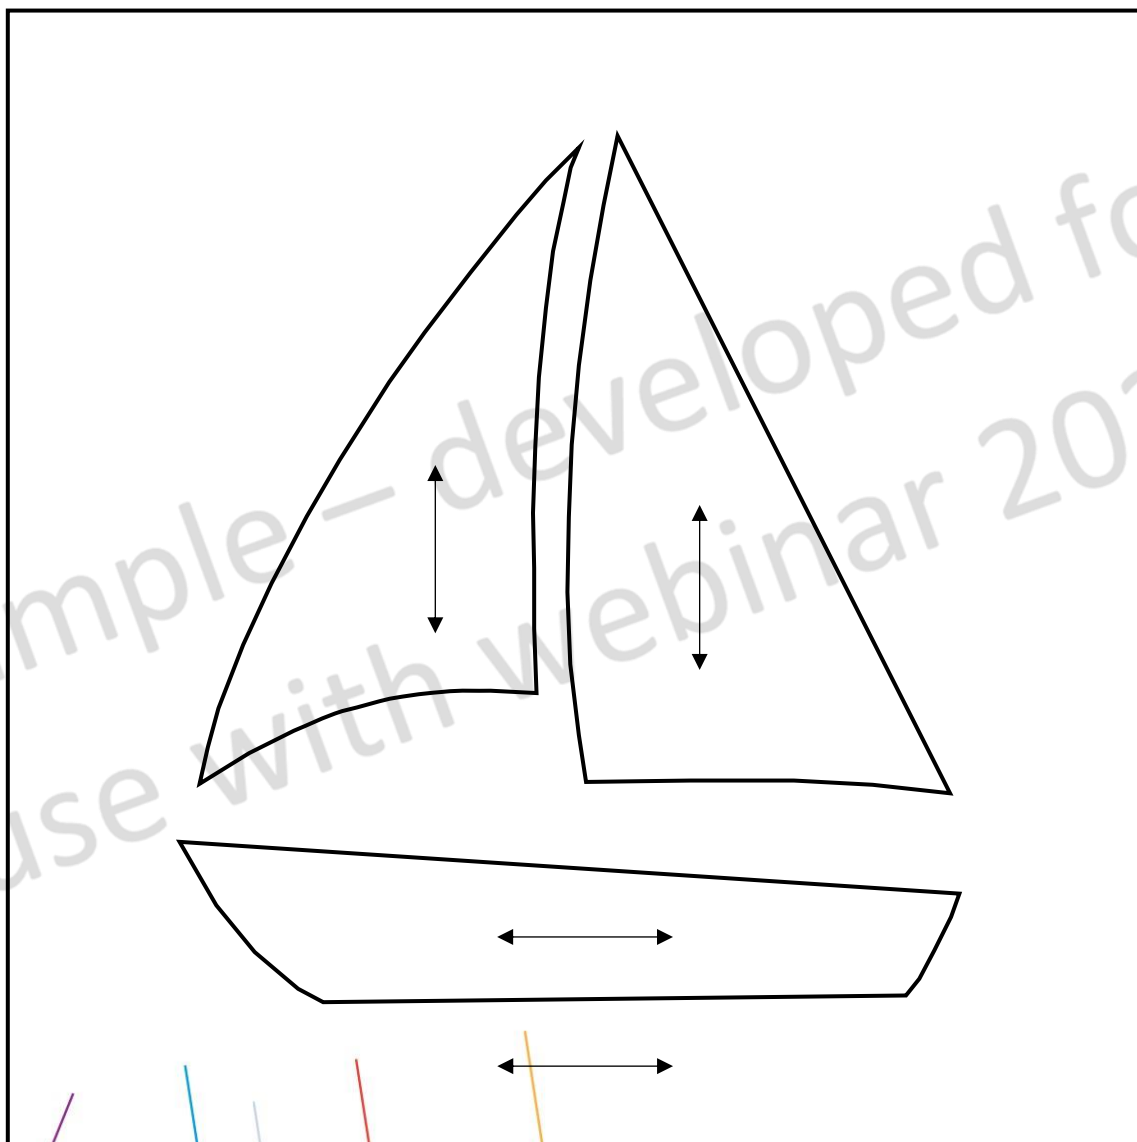

A big thank you to the teacher who participated in the webinar.

Note: It is recommended that you watch the webinar in conjunction with using this resource to contextualise the resource.

Marquetry – ‘A look through the window’

Join us as we explore the craft of marquetry with a focus on the window method. We will consider how the craft of marquetry can be experienced using an integrated approach, gaining an insight into the selection of veneer, methods of design transfer, basic equipment, preparation of materials, cutting technique and assembly.

Included in this PDF are some printable templates to use in conjunction with the webinar broadcast.

Please have the following equipment to hand should you wish to partake in some of the activities that have been set up for the webinar:

- A scalpel/craft knife (or equivalent)
- masking tape (low tack preferably)
- steel rule
- carbon copy paper
- pencils and fine liner pens
- birch plywood groundwork 6mm x 150mm x 150mm
- a selection of veneer (170mm x 170mm is the largest size required)
